TUESDAY, JANUARY 22, 2019
11:30-1:00 | ELINGS HALL 1601

INTRO TO RMARKDOWN

In this session, participants will use the rmarkdown package to create compelling documents. Julien Brun, a Scientific Programmer with NCEAS, will introduce how this format can be used to make data processing and analysis more reproducible by combining, documentation and R code chunks into one document, that can be rendered in different formats (html, PDF,etc) to be shared.
